Porch Life and Porch Comfort

June—famed for Brides and Roses—is the time to decide "How shall we furnish our outdoor living room?"

From now on the porch or outdoor living room becomes the one place where the home-folk spend much of their time until the shortening days shall silently announce the passing of summer.

The problem of furnishing YOUR porch—be it modest or pretentious—so as to make it cosy and attractive—is easily solved by the use of CREX Grass Rugs, the logical and almost indispensable porch covering.

CREX rugs are made in beautiful blues, greens, browns and combination color effects, in sizes that will fit most any space. They are not affected by rain or dampness; lie flat and will not "curl" at the edges and are heavy enough to withstand ordinary gusts of wind.

The use of CREX rugs is by no means confined to the porch. More and more each year their use is becoming general throughout the house. They are equally well adapted for the living room, dining room, hall, and bed rooms; in fact, any place where rugs can be used. For indoors in summer they are a most sensible investment, saving as they do the wear and tear on expensive coverings, which can be cleaned and stored during the hot months.

A genuine CREX rug is easily identified, the name C-R-E-X is woven in the edge of the side binding. We advise you to look for this name when you buy. It will not only protect you against imitations, but will also insure you the fullest satisfaction.

CREX rugs are patented under U. S. Govt. Copyright. Dealers found guilty of wilful substitution or fraudulent misrepresentation will be prosecuted to the fullest extent of the law.

Our handsomely illustrated 32-page color catalogue "DISTINCTIVE RUGS and FURNITURE" will be mailed free—upon request. Ask for Catalogue No. 46.

The Nestlé Permanent Hair-Wave

The permanent waving of a head of hair is an important matter, and who ever wants to have this work done would do well to see that the person who does it is under full responsibility. There are over 200 various hair-textures to be known and considered by the permanent hair-waver and positively every head will be benefited by a permanent hair-wave if done by the scientific expert, while success is merely a matter of luck for him who talks about a "Waving Machine," like the old barber surgeon whose science ended with the sharpening of his knives.

C. Nestlé Co. is the only firm in existence specializing in permanent hair-waving. In London, where the Permanent Wave was first made public in 1905 by Mr. Nestlé, over twenty experts of very long training are at the disposal of the public. In New York the success of The Nestlé Wave has been extraordinary, and our staff has increased from two in 1915 to nearly twenty, all intimately connected with permanent hair-waving and nothing else. Their training does not allow them other work.

Over 50,000 heads of hair were waved by the Nestlé staff during the last eleven years and no complaint has ever been made in connection with their work as permanent wavers. No action was ever threatened or brought against Nestlé, because his work is a scientific study and the results are as accurate and satisfactory as science can make them.

Mr. Nestlé is in attendance in New York and supervises all work. Apply for illustrated and descriptive booklet.
