

A Revolution in the Treatment of Rectal Diseases.

PILES

radically and permanently cured in a few weeks without the knife, cutting, ligature or caustics and without pain or detention from business.

FISTULAS

of the most formidable character completely cured without the use of an anæsthetic, confinement to bed or pain. Fissures, Ulcers and all other rectal diseases treated with unfailing success by

Dr. Lighthill

Specialist in rectal diseases.

New York Office at the

STURTEVANT HOUSE,

Cor. Broadway and 29th St.,

where Dr. Lighthill can be personally consulted from 2 to 5 every afternoon, Sundays excepted. Private entrance to Dr. Lighthill's office on 29th St.

The brilliant success of Dr. Lighthill's practice is vouched for by hundreds of well-known patients who have been radically and permanently cured of desperate cases of rectal diseases after the best medical skill had completely failed. In support of this statement we publish below, by personal permission, a few of the many cases on record, all of them subject to the strictest investigation. Dr. Lighthill deems it proper here to state that no case is ever published or referred to in any way except by the special permission or desire of the patient.

Mr. Henry B. De Hamel, Commission Merchant, 18 Broadway, New York:

A terrible case of protruding piles of many years' standing, subject to attacks of inflammation which rendered him unable to sit at a time, suffering constant pain. The protrusion was so large and constant that he had to wear a supporter to walk with any degree of comfort. Was completely cured by Dr. Lighthill in a few weeks without interference with his business. Feels like a new man.

Mr. Geo. Gillette, of the Gillette Clipping Machine Co., 110-114 W. 32d St., New York:

A case of fistula of many years' standing, which had penetrated deeply into the flesh and the surrounding tissues. Was treated without the least benefit by five well-known New York physicians, three of them being professed specialists in rectal diseases. Completely cured by Dr. Lighthill in five weeks, and attended to his business with comfort during the entire treatment.

Mr. P. J. Byrnes, Carpenter and Builder, No. 105 East 35th St., New York:

A case of protruding piles and fistula. Was suffering perfect agony when he applied for treatment. Employed the best medical skill he could hear of without benefit, but was radically and permanently cured by Dr. Lighthill of both complaints, and feels now that life is worth living; did not think so before he was cured.

Mr. Geo. F. Rieman, Commission Merchant, No. 545 Broadway, New York:

A case of piles of many years' standing, which was very painful and very often bleed profusely. Tried several physicians and all the usual remedies without benefit, but was radically and permanently cured by Dr. Lighthill without pain or interference with his business. Is in splendid health since the cure was effected.

Mr. R. J. Howe, No. 960 East 169th St., New York:

A case of protruding piles of the worst form of over 25 years' standing. Could not walk a few blocks without pain and distress and without being obliged to replace the protruding tumors. All efforts for relief proved disappointing, but was completely cured by Dr. Lighthill without pain or inconvenience. Has now a natural operation of the bowels for the first time in many a year and can scarcely realize the changed condition of things.

Mr. I. F. Moritz, of No. 61 East 73d St., New York:

A very painful case of protruding piles which would often bleed for half an hour at a time after an operation of the bowels and was subject to acute attacks of inflammation, when the pain was agonizing. Was completely cured by Dr. Lighthill in a few weeks, and feels like a new man.

Mr. M. Stonehill, No. 115 East 82d St., New York:

A case of protruding piles and fistula. The fistula was of unusual severity, being fully 5 inches long, 2 inches deep, and had numerous ramifications. Was completely cured by Dr. Lighthill of both complaints, and was able to attend to his daily duties during the entire treatment.

Hundreds of additional references to patients in New York and vicinity who have been cured by Dr. Lighthill after all other means had failed will be cheerfully furnished.

Dr. Lighthill has nothing to sell or to send. A personal application is indispensable for advice, treatment or terms.

Dr. Lighthill can be consulted at his office, No. 560 Broad St., Newark, N. J., from 8 to 12 daily. Sundays from 9 to 1.

ALASKA A PARADISE, AVERS MR. SULZER.

Congressman William Sulzer.

Congressman Grows Enthusiastic in Describing His Experiences in the Northern Territory, and Advises All to Visit It.

more intelligent and a more law-abiding people in America. I found the people up there in every place I went, kind, courteous, considerate and hospitable. They welcome strangers and travelers to their homes, and never tire of doing all they can for your comfort and entertainment. "How about the climate of Alaska?" Mr. Sulzer was asked. "Like many other things regarding Alaska there is a great deal of misinformation abroad regarding the climate of that territory," said the Congressman. "As a matter of fact, Alaska has a splendid climate. Along the Pacific coast the climate is tempered by the warm Japan current, and there the climate is never very hot nor very cold. In some places along the coast, the thermometer never reaches zero in winter, and averages about 35 degrees in the summer months. The climate is mild, healthy and invigorating, and all kinds of fruits and vegetables grow in great abundance. In some places the shrubbery and undergrowth have a tropical luxuriance.

Weather Not Changeable.

"The people do not dress in furs and skins as many suppose. In fact they do not feel the heat or the cold as much as the people who live in Washington or Richmond. To the north of Sitka, and westward across the range of the Rockies, however, the winters are colder and longer, and the summers hotter and shorter. But here to all is so pure and dry you do not feel the heat or the cold as much as we do in the City of New York, and the weather is not all so changeable. You hear no complaints from the people of Alaska about the weather, and once a resident here always a resident. Nobody ever settles there and wants to move away. No place in the world is more favored by Providence than Southeastern Alaska. It has no snakes, no poisonous insects and no bugs. It is unacquainted as a health resort, the young man starting out to make his fortune in the world, no better advice could be given than to say, 'Go to Southeastern Alaska.' We are only on the threshold of the future of that vast and magnificent undeveloped land—a trip to whose domain will be a liberal education to every American citizen, and impress him with the mighty possibilities of its future greatness."

Mr. Sulzer was asked how the new code for Alaska, which was passed in the closing days of the last Congress, and which went into effect the first day of last July, operated, and it gave general satisfaction to the people. "As I said before," he answered, "the people of Alaska are a Christian, law-abiding people. There is very little crime in the territory. The code, as you know, was

hastily prepared and rushed through Congress in its closing days. The members knew very little about Alaska. It was an urgent expediency measure, and contained many defects which must be remedied by the next Congress. In a general way, however, it seems to work well and give satisfaction. Nevertheless, with an increasing population, the district must be furnished with a better government. Congress must immediately take up this question, and comply with the wishes of the people who live there. They need more schools, more courts, more peace officers, and a better system of jurisprudence. The country must be surveyed, charts and maps must be made, and light-houses must be built. "The great drawback to-day in the development of Alaska is the lack of transportation. The steamers are too few and too poorly paid; their number and salaries should be increased, and the money spent in and for the district, and not paid into the national treasury. In short, the people of Alaska should have the right to govern themselves, and the only way to do this is to give them the right to elect their own representatives. "This could be done at once. "To Work for a Change. "When Congress convenes I shall introduce several bills to help Alaska, among them a bill to give them territorial government, like Oklahoma, New Mexico and Arizona, so that they will have local self-government and be represented in Congress by a delegate of their own choosing; another bill to protect the fish and game from being exterminated by the cannery men and the ruthless pelt hunters; and a third bill to extend the number of public schools and to extend the facilities of popular education; another bill to protect the forests from being destroyed, and several other minor bills. "I promised the Alaskans I would do all I could for them in Congress, and I believe in no other effort for their benefit in their country, and I believe they should have the right to vote and the inalienable right to govern themselves. The capital, Sitka, which is situated on an island remote from the commercial centres, to some more convenient, central and advantageous place on the mainland. "The people of Alaska have been neglected too long. They have been patient, but patience and hope with them that the President will devote some space in his next annual message to Congress on the subject of the people of Alaska, and that Congress will heed the recommendations. The people of Alaska should not be taxed without representation, and the American Government, and we vindicated that principle and achieved our independence by reason of it in 1776. "How about the boundary question?" Mr. Sulzer was asked. "The boundary question," he said, "is a very important one, and it is settled satisfactorily to both parties. The people of Alaska are not to be taken away from them, and the Government of the United States will not relinquish any part of its territory not to cease any of its territory of Alaska to Canada. "The boundary line is fixed, and in my opinion, it will remain just as it is, and it is not necessary for any of us to enter the Yukon district. They can get this by building a railroad, and their own land east to Dawson City in the north. If the Washington Administration in Alaska the President could not carry a single Pacific coast State in the next Presidential election. "The boundary question is the all-absorbing topic of discussion on the Pacific coast, and it seems to me we should never consent to arbitrate our sovereignty or the nationality of our people. The general feeling among us seems to be that the eleventh-hour pretensions of the Canadians, owing to the discovery of gold in the Klondike, are, to say the least, preposterous. "There are numerous Indian tribes in Alaska, and I found these Indians honest, sober, industrious and very well-to-do. They make considerable money fishing in the summer time and hunting and trapping in the winter time. They all live in permanent settlements. "These Indians are totally different in every way from our Western Indians. In fact, an entirely different race. They belong to the Totemite race, and no doubt their ancestors came across the Bering Sea from the Asiatic continent. In my opinion, these Indians will never be a burden on the Government, and will never need to be sent to the reservation. "Let me say in conclusion," said Mr. Sulzer, "that the Sunday Journal is the favorite and popular paper with the people of Alaska. It takes no time and no money to get to get it, but its arrival is looked forward to with genuine delight, and it is the household magazine until the next issue is published. The Journal keeps the Alaskan people informed about the outside world, and it is the only New York paper I found in all that vast territory."

SHOE SALE. MATTHEWS

READY TO FILL ORDERS IN ALL DEPARTMENTS.

The Famous \$3.50 Carlisle Shoe for Women at \$1.95 a Pair.

This sale concerns an offering of over 1,800 pairs of Women's Shoes, made of splendid, soft, dongola and glazed kid, in button and lace. Every pair has handwelted, extension, fall weight soles, on the most popular toe shapes of this season's styles, including the medium, bulldog, English, opera, round, and broad common sense and comfort lasts, for those who demand extreme comfort for their feet. They have cloth and kid tops, with patent leather or kid tips. The soles are the best Texas oak tanned leather, are flexible, have smooth innersoles, no thread or nails to hurt the feet; the trimmings and everything about them are of the very best, and for fit, wear, comfort and style nothing better can be made. All sizes and every width. They are from the factory of the Carlisle Co., of Carlisle, Pa., whose reputation is one of the best in the making of Women's Shoes, and a trade chance has given us the opportunity to again demonstrate that our shoe offerings are always the best values in the city.

RUPTURE CURED

AN IMPROVEMENT!

Once upon a time we travelled in stage coaches. Now it is team or electricity. What electricity is to the stage coach the IMPROVED ELASTIC TRUSS is to all other trusses. It is an improvement. Some time, however, there may be invented a better truss than ours, but at present it is the best, and there is nothing better than the best. It cures Rupture, and it cures it without torture. Every doctor who knows about it recommends it. It is to be put on, and kept on night and day until cure is effected. You would not know it was there were it not for the ease and relief it brings. There is no hard, unbending iron or steel spring to work into the delicate flesh. It is soft, elastic, pliable, easily adapting itself to every movement of the body. If you are trying to get well without it, we are afraid you will keep on trying. You can't cure a rupture by constantly irritating it, and that is what the other trusses do. THE IMPROVED ELASTIC TRUSS has cured thousands. We have the right to use their names. What it has done for others it will do for you. It remains for you to decide. Write to us and we will send you free a book all about this scientific truss. We have supplied our Improved Elastic Truss to thousands of unfortunate people who have been suffering from instruments of torture in the shape of wrongly constructed and badly fitting trusses. NAVEI RUPTURES AND STOUT PEOPLE. We Never Use Drugs, Obesity Tablets or Pills of any Kind to Reduce Fat, as They Weaken the System and Often Cause Death. We reduce the flesh and at the same time cure your rupture. Obesity Belts used to advantage by corpulent people, both ladies and gentlemen, to reduce corpulence and give shape to a pendulous or relaxed abdomen. The use of these belts reduces your size and saves you from surplus fat to accumulate, also gives absolute safety from Navel Rupture; relieves the dragging sensation peculiar to a pendulous abdomen and improves the shape. COMFORTABLE BELTS MADE TO ORDER TO BE WORN AFTER ANY OPERATION. Very light weight belts, suitable for summer wear.

TO THIN, PALE PEOPLE.

Learn, if You Will, How to Put Flesh on Your Bones and Blood in Your Veins by Simply Eating the Proper Food.

While thinness can hardly be called a disease, it is certainly in many instances the result of a disease. The disease of improper food. And the simple plan of choosing proper food that you can digest is sure to remedy it.

What do the doctors say when a patient is too fat? They say avoid the foods that make fat—the starches and sugars, such as potatoes, bread, oatmeal, batter cakes, etc. And any one with half an eye can see that, vice versa, if you are thin and wish to be fat, you must choose for your diet just the food that fat people have to avoid.

"But," you say, "I eat plenty of starch food. It doesn't make me fat."

The reason is that you don't digest and assimilate it. It rushes through your system without resting anywhere long enough to do you any good.

This is where the benefit comes from a generally digested food like Loring's Corpula Food.

The weakest stomach can digest it. It is starch food ready for instant use. It doesn't have to stop anywhere to create fat.

As soon as it is swallowed it begins to feed you. Loring's Corpula Food is a fat making starch food in concentrated form. It is of a pleasant taste, needs no cooking or preparation, and is not a liquid or a medicine.

It is a rich, hearty, healthy food for thin people. Suitable for children, invalids and well people.

Grows flesh; enriches the blood; feeds muscle and brain. Druggists keep Corpula Food, price \$1.00 per package (enough for a month's supply) or it will be sent prepaid to any address on receipt of price.

Write or call on Loring & Co., Ltd., Dept. 43, No. 42 W. 22d St. (Near 6th Ave.), New York, for any further particulars. Book "How to Get Plump and Rosy" mailed free.

Dr. course," continued Mr. Sulzer, "Alaska is very sparsely settled, but I never met a more loyal, a more orderly, a
