

PEEPING IN THE ACT OF PEEPING. For Several Nights He Had Been Frightening Ladies and Children by Appearing at Their Windows.

AFTER A TRUANT WIFE. He Was Arrested on West Thirty-fourth Street and Says His Name is Jacob Baumgardner—To the Island for a Month.

Residents of that location of West Thirty-fourth street lying between Ninth and Tenth avenues are in better humor to-day than at any earlier stage of the week.

At eleven o'clock on Wednesday night the occupants of No. 423 West Thirty-fourth street discovered a tall, raw boned man crouched on all fours, looking in the basement window.

As all the occupants were of the gentler sex the consternation developed by this startling sight can be readily understood. The unwelcome intruder occasionally changed windows or retired to the sidewalk for a more extended inspection of the premises—from top to bottom.

The excitement within steadily increased. Finally the youngest and most agile member of the family rushed out of the house in search of police aid.

Policeman Thomas G. Kennedy, of the Thirty-seventh street station, was found at the corner of Tenth and West Thirty-fourth streets.

Kennedy was promptly to respond to the call, and surprised the man just as he had stretched himself out at full length for another observation. His arrest was made with considerable difficulty, and as he resisted the club was used several times on the way to the station.

The prisoner's explanation was unsatisfactory. He said he was searching for his wife, who had deserted him. He had a letter from her, which he had "exterminated her." This, he added, was punishment wholly inadequate, but the best he could do under the circumstances.

Police officers were arranged before Justice Ford yesterday morning and committed to the island for one month.

It is believed to be insane and an investigation of his condition has been ordered by the Court.

SMALL BEGGERS OF TIBET. Since the man was disposed of many people have come forward to tell of strange and startling things that have taken place during the last few nights on West Thirty-fourth street.

On Sunday evening with the initial appearance of Mr. Baumgardner, who since then has spent his nights in frightful apparitions, a small woman, peering in upon frightened women, threatening children, suddenly withdrawing at the approach of inquisitive neighbors.

An open knife was found in his possession at the time of his arrest.

CAUGHT SAWING THROUGH A ROOF. A BURGLAR TRAPPED BY ALARM WIRES ON TOP OF "ISLAND NO. 10."

"Island No. 10" is an irregularly shaped plot of ground bounded by Catharine street, East Broadway and Chatham square. During the late war it was tenanted by thieves and criminals.

Now it is nearly covered by the big four story hardware store of White, Van Ghan & Co., at Nos. 15 and 17 Chatham square, and the Kingston Hotel, a clean cent lodging house, which fronts on East Broadway.

About eight o'clock last night the burglar alarm wires which cover the White Van Ghan establishment were disturbed. Two men were sent to investigate the matter. They went to the third floor of the hardware store, when they heard some one sawing the roof. The sound of the saw could be heard only while the train of the Second avenue elevated road, which runs close to the building, were passing. When the trains were out of hearing the sawing stopped.

The men notified Policeman Mackay, of the Oak street station, who was on post. He stationed another policeman at the entrance to the building, and taking a third patrolman with him and accompanied by the other men, went around to the Kingston Hotel, where they saw a man peering from the top of No. 17 Chatham square until they sighted the would-be burglar.

He laid on top of the scuttle of No. 15 and was sawing. When he saw the policeman, however, he stopped and surrendered. He said that he came to the building to see a woman who had been years old, and that he roomed on the top floor of the Kingston House. Murdock claimed to be a house painter, and was in the habit of going to see his way into the White Van Ghan store in order to obtain some tools to work at his trade with.

Murdock had ripped the tin covering from the scuttle and had made good progress with his saw when he was caught. In his possession was found a coil of wire, a large rasp, a large bag, a bit of rope and a candle.

He was taken to the Oak street station and locked up, still protesting that he did not intend to steal anything from the building, and was merely watching the place.

While the police were making their ascent to the roof a young man passed them on the stairs of the Kingston House. He landed subsequently at the house, and was the roommate of Murdock and that the couple had been stopping at the house about two weeks. The fellow concerned in the burglary is the police believe Murdock to be an old burglar. He is a determined looking fellow. The door of the room that he had occupied was open, and the Kingston House opens near the stairs leading to the roof of the building, and it was easy for them to reach the roof of White, Van Ghan & Co.'s store from that point.

INSPECTIONS HAVE BEEN ORDERED. Adjoint General Butler has ordered the annual inspection and muster of the First and Second brigades as follows:—

Thirteenth regiment—Brooklyn, Monday, April 20, at eight P. M. Fourteenth regiment—Brooklyn, Tuesday, April 21, at eight P. M. Twentieth regiment—Brooklyn, Wednesday, April 22, at eight P. M. Twenty-second regiment—Brooklyn, Thursday, April 23, at eight P. M. Twenty-fourth regiment—Brooklyn, Friday, April 24, at eight P. M. Twenty-sixth regiment—Brooklyn, Saturday, April 25, at eight P. M. Twenty-eighth regiment—Brooklyn, Sunday, April 26, at eight P. M. Thirtieth regiment—Brooklyn, Monday, April 27, at eight P. M. Thirty-second regiment—Brooklyn, Tuesday, April 28, at eight P. M. Thirty-fourth regiment—Brooklyn, Wednesday, April 29, at eight P. M. Thirty-sixth regiment—Brooklyn, Thursday, April 30, at eight P. M. Thirty-eighth regiment—Brooklyn, Friday, May 1, at eight P. M. First New York City, Monday, May 2, at eight P. M. Second New York City, Tuesday, May 3, at eight P. M. Third New York City, Wednesday, May 4, at eight P. M. Fourth New York City, Thursday, May 5, at eight P. M. Fifth New York City, Friday, May 6, at eight P. M. Sixth New York City, Saturday, May 7, at eight P. M. Seventh New York City, Sunday, May 8, at eight P. M. Eighth New York City, Monday, May 9, at eight P. M. Ninth New York City, Tuesday, May 10, at eight P. M. Tenth New York City, Wednesday, May 11, at eight P. M. Eleventh New York City, Thursday, May 12, at eight P. M. Twelfth New York City, Friday, May 13, at eight P. M. Thirteenth New York City, Saturday, May 14, at eight P. M. Fourteenth New York City, Sunday, May 15, at eight P. M. Fifteenth New York City, Monday, May 16, at eight P. M. Sixteenth New York City, Tuesday, May 17, at eight P. M. Seventeenth New York City, Wednesday, May 18, at eight P. M. Eighteenth New York City, Thursday, May 19, at eight P. M. Nineteenth New York City, Friday, May 20, at eight P. M. Twentieth New York City, Saturday, May 21, at eight P. M. Twenty-first New York City, Sunday, May 22, at eight P. M. Twenty-second New York City, Monday, May 23, at eight P. M. Twenty-third New York City, Tuesday, May 24, at eight P. M. Twenty-fourth New York City, Wednesday, May 25, at eight P. M. Twenty-fifth New York City, Thursday, May 26, at eight P. M. Twenty-sixth New York City, Friday, May 27, at eight P. M. Twenty-seventh New York City, Saturday, May 28, at eight P. M. Twenty-eighth New York City, Sunday, May 29, at eight P. M. Twenty-ninth New York City, Monday, May 30, at eight P. M. Thirtieth New York City, Tuesday, June 1, at eight P. M.

AGAIN THE EDGAR MYSTERY. The woman who recognized the body of the Astor House suicide as that of George Edgar, a relative of James H. Edgar, the Getty House (Yonkers) suicide, called upon Messrs. De Witt & Edgar, undertakers, in that place, yesterday, and desired them to take charge of the Astor house suicide's body.

city and remove the body to Yonkers, where she has a home, and to be buried in the body of the Getty House suicide in St. John's Cemetery.

The mysterious woman said she would defray all expenses. Notwithstanding her instructions the body of the Astor House suicide still rested in its pine box on a slab in the Morgue last night.

MATRIMONY'S YOKE IRKSOME. CROSS SUIT FOR DIVORCE BETWEEN A WELL KNOWN RAILROAD MAN AND HIS WIFE.

BY TELEGRAPH TO THE HERALD. GRAND RAPIDS, Mich., Feb. 19, 1891.—Clayton E. Gill, a well known railroad man, was married four years ago to Della Davis, a school teacher. They lived together but two months and then separated. Mrs. Gill filed a petition for divorce some time ago, but it was a profound secret until today, when she asked out. She makes serious charges against him.

He has filed a cross bill and she a supplementary bill, and she has promised that the trial will bring out sensation to the matrimonial infidelity.

TOO MUCH MONEY TO FIGHT. HEIRS TO THE ANNEKE-JANS-BOGARDUS CLAIM WHO ARE NOT IN THE CONTEST.

CHICAGO, Ill., Feb. 19, 1891.—A despatch from New York city says that there are at least sixty Chicago people who are heirs to the famous Anneke-Jans-Bogardus estate, now in litigation in New York city.

"I am one of the direct heirs," said Mr. H. D. Bogardus, of this city, to-day, "but I don't believe I'll ever get a cent of the \$300,000 involved. Possession is nine points of the law, and the Trinity Church Corporation has possession and has had for over a hundred years. I am directly descended from the Rev. Mr. Bogardus, the second husband of Anneke Jans and direct heir to the estate. I don't remember, was dissolved on February 1 to allow Mr. Knos to devote himself to the management of the Missouri, Kansas and Texas Railroad Company, of which he was made president two years ago. Mr. Knos' business partner was Thomas C. Beck and the firm's office was No. 45 West 42nd street. It was a member of the Chamber of Commerce and of the Ohio Society. He leaves a wife and a daughter. He was buried in Woodlawn. Mr. Knos' estate is now being administered by the Public Administrator of Cook County at Chicago who nominated Abraham Lincoln. When Lincoln lacked 31 votes R. G. Corwin carried. His own vote and those of Mr. Knos, John A. Gourlay and Isaac R. Stiebel, nominated Lincoln.

ALEXANDER WINCHELL, LL.D. Professor Alexander Winchell, the distinguished professor of geology and paleontology in the University of Michigan, died of Bright's disease yesterday morning at his home in Ann Arbor. He was born in North East, Dutchess county, N. Y., December 31, 1824, was graduated at Wesleyan University in 1847 and gained a high place as an educator and man of science at an early age. In 1848 he became a teacher of natural science in the Amenia (N. Y.) Seminary. He removed to Alabama two years later and had charge successively of several schools. He was called to the chair of physical and civil engineering in the University of Michigan in 1857. He held this position until 1869, when he was elected to the chair of geology, zoology and botany, which he held till 1873. In 1869-70 he held a similar position at the University of California. He was also a member of the Geological Survey of Michigan. His last work was a series of papers on the evolution of the earth, which he published in 1873. He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth." He was a member of the American Association of Geologists and Geographers, and was elected to the chair of geology and botany in 1875. He was invited to a similar chair in Vanderbilt University, Tennessee, and from that time he resided in both places. He published a series of papers on the "Geology of the Stars," based upon spectroscopic research. This was followed by "Sketches of the History of the Earth," and "The Evolution of the Earth." He was also the author of "The Evolution of the Earth," and "The Evolution of the Earth."
